

JX3-DMS2

Version Update from V. 2.00 to V. 2.01

We automate your success.

Revision 1.01

November 2015 / Printed in Germany

This document has been compiled by Jetter AG with due diligence, and based on the known state of the art.

In the case of modifications, further developments or enhancements to products shipped in the past, a revised document will be supplied only if required by law, or deemed appropriate by Jetter AG. Jetter AG shall not be liable for errors in form or content, or for missing updates, as well as for damages or disadvantages resulting from such failure.

Updating the operating system

OS file for an operating system update

For an OS update, you will need the following file:

OS file	Description
JX3-DMS2_2.01.0.00.os	Operating system file for JX3-DMS2 with version 2.01.0.00.

Downloading the OS file

Jetter AG make OS files available for download from their **homepage** <http://www.jetter.de>. OS files can be found in the support area. Another option is to follow the quick link on the JX3-DMS2 page.

OS update by means of JetSym

To update the OS, proceed as follows:

Step	Action
1	Download the OS file from www.jetter.de .
2	Establish a connection between PC and controller.
3	In JetSym, navigate to menu item "Build", then click "Update OS...".
4	Select the OS file.
5	Depending on the controller and the module the following information has to be entered: <ul style="list-style-type: none">■ Module number■ Submodule position■ Slave number■ I/O module number
6	Start the operating system update by clicking OK.
7	Result: Following Power OFF/Power ON the new OS is launched.

JX3-DMS2 version update - Overview

V. 2.00.0.00

The following table gives an overview of newly added features and fixed software bugs in operating system version 2.00.0.00:

Function	New	Fixed
Unipolar mode:		
Unipolar mode can be activated to increase the resolution of measurements.	✓	
Commands:		
MR 1y01: Commands 300, 301 and 302 let you configure unipolar mode.	✓	
MR 1y01: Commands 112 and 113 let you enable and disable a channel.	✓	
Error detection:		
Scaling error	✓	
LEDs D1 and D2:		
LEDs D1 and D2 indicate an error of the corresponding channel.	✓	

V 2.01.0.00

The following table gives an overview of newly added features and fixed software bugs in operating system version 2.01.0.00:

Function	New	Fixed
Tare function:		
Tare function through writing to MR 1y29 has been fixed.		✓
Commands:		
The speed of the A/D converter could not be increased any more after issuing command 107 (very slow mode).		✓
Module registers		
If the value was $> 2^{16}$, MR 1y27 created the possibility of an internal value overflow.		✓
MR 1y34 was introduced for correcting the sensor sensitivity. The function assigned to MR 1y11 has never been correct.	✓	
Bit 16 of MR 0 - Status - was not set, although both analog channels were ready for operation.		✓

2 New features

Introduction

Jetter AG are continuously striving to add new features and functions to the module JX3-DMS2. By updating your OS you are given the possibility to take advantage of the new functionality. To do so, you need the following ...

- an OS file
 - the software tool JetSym
 - a connection between PC and controller
-

Contents

Topic	Page
MR 1y34 - New register for setting the sensor sensitivity	8

MR 1y34 - New register for setting the sensor sensitivity

Why this register was introduced:

Up to now, MR 1y11 has been wrongly implemented. To get the correct result, the double value must be entered into MR 1y11.

Compatibility

For reasons of compatibility, there is a new MR 1y34 *Sensor sensitivity in $\mu V/V$* starting from OS version 2.01.0.00. The parameters of MR 1y34 are correct.

Module JX3-DMS2 mutually converts the values of both MR 1y11 and MR 1y34. This way, the customer is spared the otherwise necessary adjusting the software.

3 Fixed software bugs

Introduction	This chapter describes the software bugs which have been fixed in the new OS version.

Topic	Page										
Tare function has been fixed.....	10										
Command 107 cannot be undone	11										
Potential value overflow caused by the value in MR 1y27	12										
Module JX3-DMS2 does not set bit 16 of MR 0	13										

Tare function has been fixed

Symptoms

Reading and writing to MR 1y29 does not work. In MR 1y29 the tare function of scales has been implemented.

Affected versions/revisions

The following versions/revisions are affected by this bug:

OS version	< 2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Remedy/workaround

There is no remedy for the affected versions/revisions.

Remedy

Starting from the following versions/revisions this bug has been fixed:

OS version	2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Command 107 cannot be undone

Symptoms

If, by issuing command 107, you set the operating mode of the A/D converter to *very slow mode*, the conversion speed cannot be increased any more.

Affected versions/revisions

The following versions/revisions are affected by this bug:

OS version	< 2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Remedy/workaround

As a remedy, turn the module JX3-DMS2 off and on again.

Remedy

Starting from the following versions/revisions this bug has been fixed:

OS version	2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Potential value overflow caused by the value in MR 1y27

Symptoms

If you enter a value $\geq 65,535$ into MR 1y27 *User-defined scaling*, this may lead to an internal value overflow. The value overflow depends on the A/D conversion value.

Affected versions/revisions

The following versions/revisions are affected by this bug:

OS version	< 2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Remedy/workaround

As a remedy, enter only values $< 65,535$ into MR 1y27.

Remedy

Starting from the following versions/revisions this bug has been fixed:

OS version	2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Module JX3-DMS2 does not set bit 16 of MR 0

Symptoms

Even if both analog channels are ready for operation, module JX3-DMS2 does not set the global collective bit 16 in MR 0.

Otherwise, collective bit 16 is set, if the measured values are valid.

Affected versions/revisions

The following versions/revisions are affected by this bug:

OS version	< 2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant

Remedy/workaround

There is no remedy for affected versions/revisions.

Remedy

Starting from the following versions/revisions this bug has been fixed:

OS version	2.01.0.00
Hardware revision	Not relevant
Configuration or operating mode	Not relevant
